

Taking Advantage of China's rapidly developing CBM market

30 November - 1 December 2009 | Xi'an, China

www.alleventsgroup.com/coalbedmethane09

**EXCLUSIVE
PRE-CONFERENCE
NETWORKING DINNER
with your distinguished
speakers**

when register before
30th September 2009
(Terms and Condition apply)

Do you realize that by just exploring China you can access 37 trillion cubic meters of CBM reserves?

Do you want to be the early ones that get rewarded with a prime share of this booming market?

From exploration to commercialization, and the CBM energy industry in Asia Pacific needs further developments, hence, you should be at the forefront of these developments.

Ask yourself, are you well prepared to invest and exploit CBM reserves in this thriving yet challenging market?

If the answer is YES, then this is the unmissable CBM event of the year.

The **2nd Annual Asia Pacific CBM Week** sets a gateway for all global operators and investors to access the Asia Pacific CBM market - in one room, one location. Take advantage of the unique opportunities in the booming marketplace, especially in China.

By attending you will:

- Gain insights from policy makers and experts speaking on current market developments and trends, future projections in current economic and regulatory context, ensuring you're at the forefront of any new business opportunities that is available
- Obtain practical, hands-on and innovative strategies that relates to Exploration, Exploitation, Drilling, Production, Utilization, Transportation and Commercialization, and apply them in your operations effectively
- Network with the very decision makers that will make your CBM project a reality

Act now!

Join all key global players this October in Xi'an.

Your Distinguished Speaker Panel:

Peng Qiming
*Director, Department of Geological
Perambulation
Ministry of Land and Resources, China*

D N Prasad
*Director (Technical)
Ministry of Coal, India*

Sun Maoyuan
*Executive Director
China United Coalbed Methane Co., Ltd*

Lei Huaiyu
*Director General, New Energy Division
China National Petroleum Corporation*

Li Jingming
*Principal Geologist, CBM
China National Petroleum Corporation*

Nick Davies
*CEO and Managing Director
Arrow Energy*

Michael R. McElwrath
*CEO and President
Far East Energy Corporation*

He Jiuchang
*Deputy Director General
Shaanxi National Development and Reform
Commission*

Robert P. Taylor
*Lead Energy Specialist, East Asia Energy and
Mining Unit
World Bank*

Bert Bekker
*EU Natural Gas Manager
EU-China Energy and Environment Programme*

Imam B. Sosrowidjojo
*Director
LEMIGAS, Republic of Indonesia*

Huang Shengchu
*President
China Coal Information Institute*

Randeep Grewal
*Chairman and CEO
Green Dragon Gas*

The 2nd Annual

ASIA PACIFIC CBM FORUM 2009

Taking Advantage of China's rapidly developing CBM market

30 November - 1 December 2009 | Xi'an, China

www.alleventsgroup.com/coalbedmethane09

Dear Colleague,

China central government's 11th Five-Year Plan set the CBM annual production target at 10 billion cubic meters by 2010. So far till 2009, China has produced only 7 billion cubic meters of CBM. With the Chinese government pushing for another 3 billion cubic meters of gas from CBM operators by 2010, why aren't you here where the opportunity is?

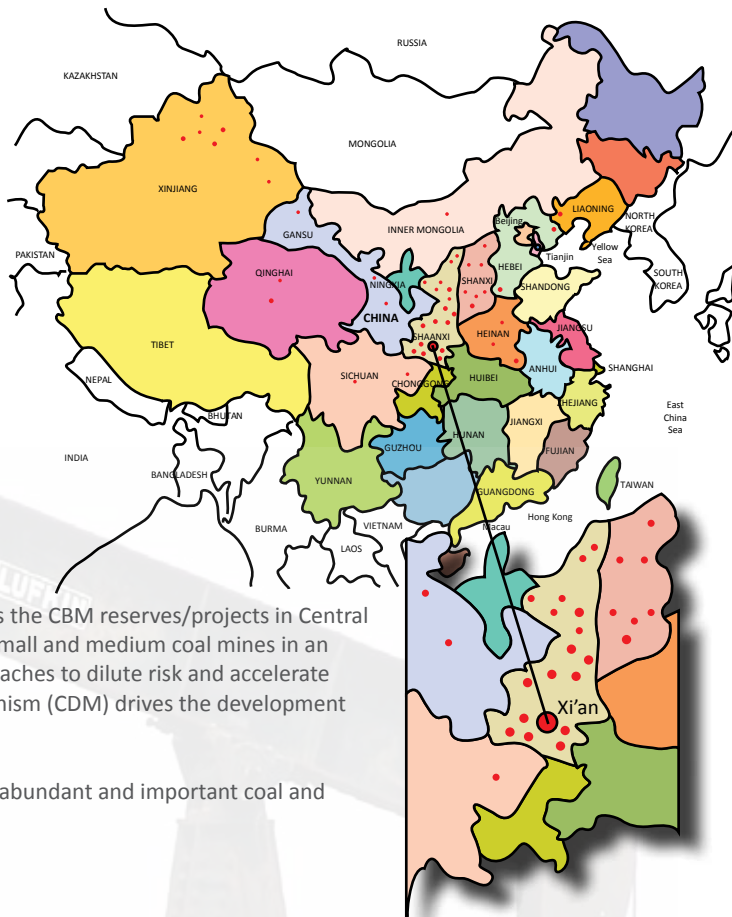

While 12th Five-Year Plan is being drafted to enforce and drive CBM developments in China, the 2nd Asia Pacific CBM Week sets the gateway for all operators and investors globally to access the Asia Pacific, especially China CBM market.

Here we are, exploring the most imminent opportunities in the rapid process of CBM industrialization and commercialization in the booming CBM marketplace.

Through leading sessions, interactive panel discussion and well-selected specific practice case studies, we will dissect the core complex of CBM investments and operations in China: How to evaluate and access the CBM reserves/projects in Central and Western China? What are the feasible strategies to explore CBM in small and medium coal mines in an economic manner? How to raise capital and what are the strategic approaches to dilute risk and accelerate CBM projects? How and to what extent does Clean Development Mechanism (CDM) drives the development of CBM projects?

Join us in Xi'an this October, the city located at the heart of China's most abundant and important coal and CBM reserves.

Leo Deng
Event Director, All Events Group

Who Will You Meet?

- Coal/CBM Mining Operator
- Oil and Gas Operator
- Energy Company
- Government
- Mine Owners
- CBM Utilizer
- Investor
- Distributor
- Service & Technology Provider
- Energy & Environmental Consulting Company
- Equipment Supplier
- Infrastructure Construction Company
- Carbon Trader/Fund
- Environmental Protection Agency
- Research Institutes/Universities
- Coal/CBM Mining Operator
- Chairman/President/Managing Director (MD)
- President/VP/MD/Chief Geoscientist
- President/VP/Director
- Senior Officials
- MD/GM/Business Development Director
- President/GM
- GM/Business Development Director
- CEO/CFO/COO
- Business Development Director
- VP/GM/Head of Regional Director
- Sales and Marketing Director
- Corporate Development Director
- CFO/Controller/Fund Manager
- Senior Officials/Analyst/Economist
- Chief Scientist/Geoscientist
- Chairman/President/Managing Director (MD)

Why attend 2nd Annual Asia Pacific CBM Week 2009

Network and build your business case with CBM operators and coal mine owners

- Get access to the most outstanding CBM opportunities in Central and Western China

Make key allies and get the most current analysis of the industry

- Meet Ministry of Land and Resources, Chinese provincial NDRCs and other senior government representatives in a pleasant environment
- Forge business partnerships to accelerate your CBM project development
- Hear from the world's top industry leaders on the most important issues of the day

Discuss local business environments for CBM projects in Asia

- Share experiences with regional project owners themselves
- Understand the dissect the complex of operating CBM projects in China
- Learn more about the latest and upcoming projects

09:00 Opening Address by Guest of Honor

He Jiuchang, *Deputy Director General, Shaanxi National Development and Reform Commission, China*

09:30 Evaluating future scenarios in the global energy market and the pathway to a sustainable economy

- A re-evaluation of CBM: fitting CBM in the big picture of future energy market
- Feasibility study of CBM commercialization in China: key solutions to drive the CBM developments in China
- Strategy approaches of CBM investment
- Case study

Bert Bekker, *EU Natural Gas Manager, EU-China Energy and Environment Programme*

10:00 Overview of the emerging Asia Pacific CBM market:

- Understand the current and future potential demands of unconventional gas
- Evaluate the new opportunities and challenges in the Asia Pacific CBM market
- Gap analysis of Asia Pacific CBM developments
- Strategy approaches of operating CBM
- Case Studies

Dave Mathew, *Executive Director, Arrow Energy*

10:30 China Energy Market Outlook: CBM Pricing and commercialization

- A detailed look into current energy consumption: the demand-supply dynamics
- Coalbed methane commercialization challenges and possible solutions
- Coalbed methane pricing issues and strategy approaches of CBM operators
- Case study

Michael R. McElwath, *CEO and President, Far East Energy Corporation*

11:00 Tea Break

11:30 Overview of current developments and future projections of China CBM/CMM

- Central Government's policy facilitation of CBM/CMM developments: how to benefit from these policies and drive CBM developments
- A current project review of China CBM/CMM
- Key approaches of CBM/CMM utilization in China
- CBM recovery issues

Huang Shengchu, *President, China Coal Information Institute*

12:00 Panel Discussion: Roadmap to commercialization of CBM in Asia Pacific

- Gap analysis of CBM Commercialization
- Overcome current hurdle of CBM Commercialization
- Market forecast of Asia Pacific CBM in 2010 and beyond
- Opportunities of CBM in Asia Pacific
- Lead time to Commercial Production
- Lessons learnt from CBM commercialization across the world

12:30 Luncheon and Networking Session

13:30 Advanced extraction technology of CBM

- Drilling and coring aspects of CBM
- Surface water and ground water management
- Lessons learnt from around the globe
- Case studies

Li Jingming, *Principal Geologist, CBM, China National Petroleum Corporation*

14:00 CBM Production Technologies

- Customized well design and well completion under varying conditions
- Production Management of CBM Drainage Wells
- Pilot production and commercial appraisal
- Case studies

Lei Huaiyu, *Director General, New Energy Division, China National Petroleum Corporation*

14:30 A regulatory review of CBM in Indonesia

- CBM extraction permit issuance in Indonesia
- Application procedures and requirements of CBM permits
- Investment Opportunities of CBM in Indonesia for foreign investors
- Reviewing Central Government's future plan for CBM developments
- Case studies

Imam B. Sosrowidjojo, *Director, LEMIGAS, Republic of Indonesia*

15:00 A guide for international players to access China CBM market

- Central Government's policy facilitation of CBM developments: how to benefit from these policies and drive CBM developments
- A current project review of China CBM
- Assess different modes of gas transport and utilization
- Sharing our successful stories

Fu Xiaokang, *Director, International Cooperation Division, CUCBM*

15:30 Tea break

16:00 Discover the CBM opportunities in China

- Investment Opportunities of China CBM
- Drive CBM developments by CBM project financing and evaluating the investment risk involved
- Practice experience of CBM implementation in China

Randeep Grewal, *Chairman and CEO, Green Dragon Gas*

16:30 CBM Exploitation

- An overview and outlook of China 5-year plan: Major breakthroughs of 973-project
- Latest update of CBM Reserves and current developments of China's CBM projects
- Practice experience of technology realization

Dr. Song Yan
*Chief Scientist, 973-project, China 5-year plan
Deputy Director, Research Institute of Petroleum Exploration and Development, China National Petroleum Corporation (CNPC)
Member, Chinese People's Political Consultative Conference (CPPCC)*

17:00 Closing Remark of Day One Conference

Site Visit Tour

Obtain hands-on practice knowledge from A to Z to operate CBM projects in China

Site Visit Tour to Hancheng City CBM projects on 1st December 2009

Hancheng City, located northeast of Shaanxi Province in China, is known as the "Coal City". It also has China's most abundant coalbed methane reserves, with proven reserve of 408 billion cubic meters.

These valuable resources attract many leading oil and gas companies to invest and start exploration on CBM projects. China National Petroleum Corporation is one of the key pioneers here and have announced that they will invest US\$231 million (RMB 1.58 billion) to develop a coalbed methane (CBM) project in Hancheng. Plans have been made to 327 wells, improve 1 CNG station and construct 5 more CNG stations by 2010.

Senior government officials and leading CBM operators will also be present at this site visit and there, all visitors will get a first hand experience in learning, visualizing and identifying CBM reserve and investment opportunities in a most vivid way.

Don't miss out on this exclusive and timely opportunity. Register for the site visit now.

Business Development, Marketing and Sales Opportunities!

Promote new or existing product and service offerings in a high profile way amongst our select group of summit partners. Sponsoring The 2nd Annual Asia Pacific CBM Week 2009 will allow you to network, and arrange meetings with, the key decision-makers moving the coalbed methane market globally and around the Asia Pacific region.

The 2nd Annual Asia Pacific CBM Week 2009 is the most prestigious CBM event in the Asia Pacific region, presenting opportunities for originating most outstanding and latest CBM projects.

Limited Sponsorships Remaining

Workshop & Seminar Sponsorships

- Obtaining Remarkable CBM Projects: From A to Z
- International Legal Framework and Context of CBM Exploitation and Production
- Connecting Markets: Strategies for Global Investment in CBM
- CBM Extraction Technologies

Exhibition Packages

Specially tailored combination of on-site presence, pre-conference branding, and exhibition space. Options include:

- 18 sq. m. exhibition stand
- 9 sq. m. exhibition stand
- 6 sq. m. exhibition stand

Available Sponsorships

- Platinum
- Gold
- Silver
- Conference
